## Third India-Nordic Summit

# Advancing Green Technology and Innovation

## Strategic Partnership

### Elevated India-Nordic relations to a Green Technology and Innovation Strategic Partnership

#### What it means?

01 Enhances cooperation in the areas of blue economy, circular economy and digital infrastructure

02 Strengthens collaboration in climate action, energy security, water and education

India and the Nordic countries launched a multidimensional partnership during the First India-Nordic Summit in 2018. The partnership focuses on innovation, green technologies, clean energy, and sustainable development. It aims to support India's economic growth, promote sustainable development pathways, strengthen skilling and talent development, and foster a vibrant innovation ecosystem. India can also leverage Nordic expertise and technology transfers through cooperation in renewable energy and climate action initiatives. The Third India-Nordic Summit, held in Oslo, on May 19, 2026, further advanced this strategic partnership. The summit strengthened cooperation in trade, investment, digital innovation, and emerging technologies. Both sides also expanded collaboration in the blue economy, maritime cooperation, **Science, Technology, Engineering, Mathematics (STEM)** research, resilient supply chains, and defence partnerships. Besides economic partnerships, India engages Nordic countries through the soft power tool of diplomacy.

#### India's Arctic Policy

Alliance with the Nordic nations is an essential component of India's Arctic Policy. Climatic changes in the Arctic, especially the melting of Arctic ice, can hugely impact weather conditions and rainfall patterns including the monsoons. These changes can be highly disruptive for India's economic, food and water security, and the sustainability of over 1300 island territories and maritime features.

India's Arctic policy titled 'India and the Arctic: building a partnership for sustainable development' is structured around six pillars: strengthening India's scientific research and cooperation, climate and environmental protection, economic and human development, transportation and connectivity, governance and international cooperation, and national capacity building in the Arctic region.

India's engagement with the Nordic region has evolved beyond traditional diplomacy into a future-oriented strategic partnership. Shared priorities in green growth, clean technologies, innovation, and sustainable development are driving this transformation. Nordic countries bring advanced technological expertise, while India offers scale, markets, talent, and manufacturing

capabilities. Together, the partnership is emerging as a key pillar of India's green transition, digital expansion, Arctic engagement, and resilient economic growth strategy.

Third India-Nordic Summit...

### How India Benefits from Cooperation with Nordic Countries

**Investment and Industrial Development:** Investments from Nordic countries support India's development in key sectors such

as renewable energy, shipping, engineering, food processing, smart urban development and clean technology. These investments contribute to industrial growth, employment generation and infrastructure development in India.

**Expansion of Indian Businesses Abroad:** Indian companies, particularly in the IT, engineering and technology sectors, have expanded their presence across Nordic countries. This strengthens India's global business footprint and creates opportunities for Indian professionals and enterprises in international markets.

**Cooperation in Green and Sustainable Technologies:** Nordic countries are global leaders in sustainability and green innovation. Cooperation with them helps India advance its renewable energy goals, climate action initiatives and transition towards environmentally sustainable development.

**Technology and Innovation Partnerships:** Collaboration with Nordic countries in innovation, digitalisation, advanced manufacturing and Arctic research provides India with opportunities for technology transfer, research cooperation and access to cutting-edge expertise in emerging sectors.

**Education and Research Collaboration:** Academic partnerships between Indian and Nordic universities promote higher education, joint research projects and student exchanges. Such cooperation strengthens India's knowledge economy and encourages innovation-driven growth.

**Diaspora and People-to-People Ties:** Large Indian communities and student populations in Nordic countries play an important role in strengthening bilateral relations. They contribute to professional sectors abroad while also promoting Indian culture and values internationally.

**Tourism and Connectivity:** Growing tourism links, direct flights and easier visa facilities between India and Nordic countries are increasing travel and cultural interaction. This supports the tourism sector and promotes greater understanding between the societies.
